

CRISTALINE is a clever combination of micro-sandblasting followed by a special dirt-resistant acid treatment. Uncomparable mat-crystal effect with easy maintenance. An exclusive product that is a favorite with those who have tried it.

Description

CRISTALINE is a sandblasting treatment for glass, combined with an acid treatment for a structured, luminous look and perfect maintenance.

Use

CRISTALINE is used to personalize private, professional and residential areas. It can be used in many ways:

- doors, windows and partitions;
- shower enclosures;
- furniture, worktops, table or desk tops, closet doors;
- safety markings for glass doors and partitions.

Advantages

Personalization

CRISTALINE can be completely personalized. It can be used in many ways to harmonize with all areas:

- alternating transparent and translucent effects;
- for making logos, designs or patterns of your choice;
- combined with other DBI surface treatments (such as color).

Beauty and light

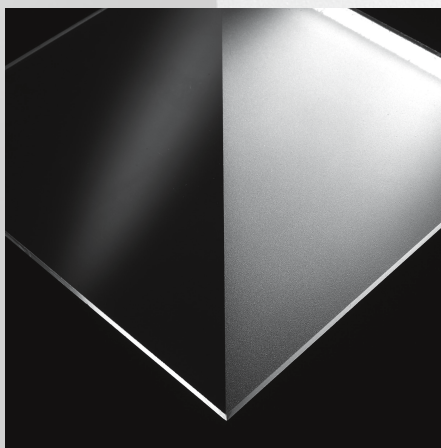

After an initial sandblasting, CRISTALINE creates refined, sparkling beauty and ensures diffused light while maintaining privacy.

Easy maintenance

CRISTALINE has the quality of being dirt-resistant and is easy to clean and maintain.

Does not alter with time

An acid treatment applied to sandblasted etching changes the characteristics of sandblasting making it dirt-resistant unlike additional protections that can alter with time.

- clear and extra clear glass
- tinted glass;
- stamped glass;
- coated glass;
- clear and colored mirrors;
- laminated glass;
- tempered glass.

Dimensions and thicknesses

There is no limit on maximum dimension or thickness for shaped work.

Transformation

CRISTALINE can be applied on glass that has already been shaped, tempered, laminated, assembled in double windowpanes. When assembled in double windowpanes, CRISTALINE can only be applied on the inside (side 2 or 3) if it is not treated in the rubber seal area. Otherwise, the side that is treated with CRISTALINE must be placed on the outside of one of the two windowpanes.

Range

CRISTALINE treatments are only made-to-measure.

One shade treatment

CRISTALINE can be applied to all or part of the surface to be treated. In this case, a text, logo, geometric design or other pattern of your choice can be made with CRISTALINE. A catalogue of patterns and designs is available, however customers may also ask for vectorization of their own illustrations.

Glass media

CRISTALINE can be applied to most glass media:
